Experience

SparkFun—*Web Developer/Systems Administrator*—**Niwot, CO** Nov. 2013–*Present*

- Build continuous integration system with Jenkins, OpenStack, CasperJS and PHPUnit
- Design and implement PostgreS trigger-based audit trail for important database tables
- Create android-tablet-based HTML5 shipping software that allows warehouse pickers to pick 20 orders in the time it used to take to pick one
- Implement MongoDB-backed asset library with JavaScript front-end used for all customer-facing image management

UpSync—*Web Developer/Systems Administrator*—**Boulder, CO** Oct. 2012–Nov. 2013

- Developed features for mobile, offline project with Zend (PHP 5.4, at the time) and a smattering of Objective-C and JavaScript
- Engineered, supported, and secured load-balanced VPC CentOS-6-based LAMP stack on AWS
- Produced several offline mobile web applications specifically built for iOS using Backbone.js, AMD, and WebSQL storages synced with MySQL 5.5

Custom Channels—*Director of Technology*—**Boulder, CO** Aug. 2009–Oct. 2012

- Built and kept-up small pool of Xen-based virtual servers
- Produced and maintained Linux (CentOS and Ubuntu) servers for file storage, streaming media, and web applications in virtualized Xen environment
- Built, managed, and backed-up apache2/nginx/MySQL servers
- Developed internal and customer-facing web services to:
 - Stream shoutcast channels, add and ban tracks from your library and build new streaming channels on-the-fly via PHP web interface
 - Automate management of 400,000 OGG, FLAC and MP3 files using Rsync, SoX, FFMPEG, Python 2, duct-tape, and blasphemous prayers

Wichita State University—*Media Resource Assistant*—**Wichita, KS** Aug. 2007–May 2009

- Maintained website using internal campus CMS
- Created and designed campus-wide mailings and emails using Adobe® Creative Suite® software
- Provided support during campus-wide Banner ERP transition
